

A.B.E.L.H.A.

Associação Brasileira de Estudos das Abelhas

10 years

This illustrated calendar references the main areas of A.B.E.L.H.A.'s activity in its 10 years, a significant milestone we celebrate in 2024. Each month brings central messages about the topics to which the Association is dedicated to, from funding scientific research, through actions in support of beekeeping professionalization in Brazil, to dissemination of agricultural pollination and sustainable practices and their benefits for crops and biodiversity.

#BeesEverywhere

A.B.E.L.H.A. is one of the main sources of information – based on science – about bees and pollinators in Brazil. Over the last 10 years, we have helped society discover our bees and their role in agriculture and biodiversity.

Digital bee

A.B.E.L.H.A. brings the science of pollinators to everyone: teachers use bees as a topic in the classroom, farmers discover how to profit from their presence in crops and beekeepers learn how to take better care of their colonies. Everyone wins - and biodiversity says thanks!

The value of beekeeping

Beekeeping (honeybees and stingless bees) can contribute to biodiversity conservation and food production. That's why A.B.E.L.H.A. works to encourage the professional and sustainable development of these activities.

Bees in agriculture

Science points to the numerous benefits of bees for the health, balance and productivity of crops. To disseminate scientific knowledge to farmers and contribute to sustainable agriculture is in A.B.E.L.H.A.'s mission.

Research support

For 10 years now, we've been diffusing what science says about bees and helping it to say much more! In order to boost research on bees and pollinators in Brazil, A.B.E.L.H.A., in partnership with CRIA, has created infoA.B.E.L.H.A., one of the largest scientific information database on neotropical bees in the world.
